CANDIDATE PROFILE *(please ensure you complete this section)*

Indicate why you are applying for this position and the skills and experience you can bring to this post. Include skills gained from a variety of work situations e.g. work placement, employment, holiday or voluntary work. Ensure that you have described how you meet the essential requirements outlined for the role.

I have a strong desire to work in the wind industry, and wish to apply my engineering acumen to this field. The MSc course I am currently studying on has strengthened my interest in this exciting and growing area. I would love to be a part of developing this clean energy source and transforming the way we generate electricity in the UK and Europe.

I have experience of managing projects to tight deadlines and to a high standard from running my own business and working for EcoVert solutions.

I am a accomplished user of IT with experience using MS Office, AutoCAD, programming languages through both academic and professional applications and more laterally have been trained using the WindFarmer software on my MSc course by Julian Pett of DNV GL.

I enjoy team work and thrive in a close-knit, collaborative team. I have been lucky enough to work in some great teams both while studying and in my current job, where there are people of many different backgrounds to communicate with.

I also have a very analytical way of thinking and have enjoyed working with data on the course, creating real-world solutions from empirical data, and writing reports giving recommendations based on my findings.
